Eligible Investors

The Fund has been designed for Eligible Investors, being investors who qualify as well-informed investors within the meaning of Luxembourg Law, i.e. institutional investors, professional investors and other well-informed investors. The minimum investment in this Fund is GBP / EUR / USD 2 million.

Investors must be able to bear loss of capital in order to seek to generate higher potential return and should be prepared to remain invested for at least the recommended holding period.

Investment Restrictions

Notwithstanding the broad powers of investment available to the Fund as a RAIF under Luxembourg Law, the Fund has adopted the investment restrictions applicable to a UCITS fund from launch.

Investment Approach

The Investment Manager adopts a stock picking approach in the belief that a thorough analysis and understanding of a company is the best way to identify long-term superior growth prospects. This understanding begins with identifying those companies where the ownership structure and incumbent management are conducive to the realisation of the aim of achieving superior long-term earnings growth.

The Investment Manager will seek to identify companies which enjoy certain key business characteristics including some or all of the following:

- a strong management record and team, and the confidence that the Investment Manager has in that management's ability to explain and account for its actions;
- proprietary technology and other factors which indicate a sustainable competitive advantage;
- a reasonable expectation that demand for their products or services will enjoy long-term growth; and
- an understanding that structural changes are likely to benefit rather than negatively impact that company's prospects.

In analysing potential investments, the Investment Manager will employ differing valuation techniques depending on their relevance to the business characteristics of a particular company. However, the underlying feature will be the sustainability and growth of free cashflow in the long-term.

Portfolio risk is mitigated by investment in a diversified spread of investments. The Investment Manager is not constrained by benchmark weightings, sector, geographical location within Europe or market capitalisation or size of investee companies.

Risk Factors

You are recommended to seek financial advice or otherwise satisfy yourself that the risks associated with your chosen investment are acceptable before investing. Investors should carefully read the Prospectus and the Key Investor Information Document (KID) before making an investment decision.

The investments in an investment company's portfolio are subject to stock market fluctuations and other risks inherent in all investments. There can be no assurance that the value of your investment will increase. The Fund invests in a small number of holdings and as such carries more risk than funds which invest across a larger number of holdings. Past performance is no guide to the future. Changes in exchange rates between currencies may also cause the value of the investment to increase or diminish. Current tax levels and reliefs will depend on your individual circumstances.
